

Clamps

For quick & easy hose connection on site

Single Bolt Clamp

Characteristics

Clamps are used to fix a hose to a coupling. This can be a temporary on-site connection or a permanent connection.

Material

Mild Steel or Stainless Steel.

Size Range

Suitable for hose diameters 19mm to 252mm.

Heavy Duty Double Bolt Clamp

Characteristics

Clamps are used to fix a hose to a coupling. This can be a temporary on-site connection or a permanent connection. A double bolt clamp would be considered the more suitable option for a permanent fixture.

Material

Malleable Iron.

Size Range

Suitable for hose diameters 17mm to 381mm. Suitable for hose where extra torque is required.
