

Globe Pattern Valves

Constructed in accordance with BS5041 Part 1

Description

A range of 65mm Nominal Diameter 'low pressure' Fire Hydrant landing valves suitable for both onshore and offshore/marine applications. Pressure rating is dependent upon inlet and outlet connections. Used predominantly on wet riser systems.

Features

- Primary shut-off by rubber to metal seating with secondary metal to metal sealing
- Department of Transport approved for compliance with Merchant Shipping Regulations

Specification

- Valve bodies and internals designed for 20 Bar working pressure, seating at shut off tested to 16 Bar
- Pressure rating of individual valves is dependant on inlet and outlet connections

Material

- Gun Metal to BS1400 Grade LG3
- Red Paint finish available as an option
- 5" Handwheel in cast Iron

Outlet Options

- 64mm Female Instantaneous to BS336
- Other optional outlets available
- Blanking Plug & Chain available as an option in Gun Metal, Rubber or Plastic

Inlet Options

PN16, BS10 Table D, ASA/150 or BSP thread.
Other options available on request.
