

## Ground Coiler

### Portable Layflat Hose Coiler

#### Rolly

**Characteristics:** The Rolly is a small lightweight, collapsible unit suitable for coiling hoses to to 76mm diameter and max length 20 metres. The unit can be easily reduced in size for storage by positioning the handle further down the shaft of the body.

**Weight:** 9.5kg

**Dimensions:** 1400 x 430mm when extended  
650 x 430mm when collapsed

**Material:** Steel components with a Red Gloss paint finish to the body.

#### Rolly III

**Characteristics:** The Rolly III is a modified Rolly and is supplied with a removable attachment for centre coiled hoses (Dutch rolled). It also has a magnetically held leg which can be extended to support the unit when not in use.

**Weight:** 10kg

**Dimensions:** 1400 x 430mm when extended  
650 x 430mm when collapsed

**Material:** Steel components with a Red Gloss Paint Finish to the body.
