

Special Fire Hose Reels

Fire Hose Reel with Foam Tank

Gun Metal piping parts, for sea water.
For use in drilling areas, production areas offshore and at petrochemical plants, helideck and industrial sites.

Fire Hose Reel and cabinet with foam tank

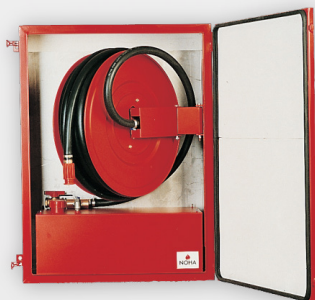

Hose reel mounted on the door, which opens 180°, connected to a 3% foam inductor fed from a 50-litre stainless steel tank. Action time: approx. 20 minutes. Ideal unit for fighting fires in carboniferous materials and flammable liquids. Is excellent for insulating spills of flammable liquids against ignition.

Offshore Fire Hose Reel with swing-arm

Gunmetal/stainless steel piping parts, for sea water. For use in accommodation and living quarters, drilling areas, production areas offshore and at petrochemical plants.

Fire Hose Reel and cabinet with 50 LTR foam tank for mounting outdoors or in a corrosive environment

Swinging hose reel combined with 3% foam inductor which is fed from a 50-litre stainless steel tank. Action time approx. 20 minutes. The stainless steel cabinet is splash-proof, insulated and equipped with a thermostatically controlled heating element and can withstand temperatures down to -35°C (measured in zero wind) without the water freezing. Ideal unit for fighting fires in carboniferous materials and flammable liquids. Recommended for insulating spills of flammable liquids against ignition.

Special Fire Hose Reels

NOHA Fire Hose Reel with 25 LTR foam tank

At 6 bar water pressure, 80 litres of water per minute is mixed with 3% foam concentrate and discharged from the hose. With a 25 litre foam container, the action time is approx. 10 minutes. Foam containers can be supplied in different sizes.

Suitable for fighting fires involving carboniferous materials and flammable liquids; the foam works as a wetting agent effective against deep-seated fires. Is also recommended for sealing spills of flammable liquids.

Model S41 - For long hoses

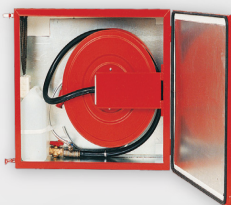

NOHA hose reel for long hoses. Robust, for fresh water use. For fire extinguishing and general cleaning and maintenance activities. Can be wall or floor mounted and has a hand crank to rewind the hose. The water supply is situated through the centre of the reel.

NOHA Fire Hose Reel for 60 bar water pressure

Similar to model S61 but has special waterways making it suitable for use with working pressures up to 60 bar. Supplied for 10 mm, 13 mm or 19 mm diameter hose.

Reel in cabinet with foam tank for mounting outdoors or in corrosive environment with 10 LTR foam tank

Swinging hose reel is combined with 3% foam inductor, fed from a 10-litre foam container. Action time approx. 4 minutes. Ideal unit for fighting fires in carboniferous materials and flammable liquids. This is the perfect cabinet-mounted hose reel for petrol stations.
