

# Water Shield

Portable water curtain

### Characteristics

The water shield provides a safety barrier against direct exposure to the radiant heat of flames by delivering a high and wide curtain of water. This can also offer protection against gases, heat and smoke. It is lightweight, portable and once in position can be left unmanned.

### Material

Light Alloy or Gun Metal

### Options

Model B 1400 lpm	Model C 800 lpm
---------------------	--------------------

### Inlet Connection

64mm Male BSP  
64mm Male Instantaneous  
All other inlet connections can be fitted using a 64mm Female BSP threaded adaptor.

### Performance Data:

Flow Rate			Throw Height			Throw Width		
Model	5 bar	8 bar	Model	5 bar	8 bar	Model	5 bar	8 bar
B	1400 l/m	1700 l/m	B	9 m	10 m	B	27 m	31 m
C	800 l/m	1100 l/m	C	8 m	9m	C	24 m	29 m
