

NOHA Special Fire Hose Reels

FIRE HOSE REEL WITH FOAM TANK

Our NOHA Special fire hose reel with foam tank is primarily for use in drilling, offshore production areas and at petrochemical plants, helideck and industrial sites. It contains gun metal piping parts for use with sea water.

Gun Metal piping parts, for sea water.

OFFSHORE HOSE REEL

Our NOHA special offshore fire hose reel with swing- arm is ideal for use in accommodation and living quarters, drilling areas, production areas offshore and at petrochemical plants. It contains gun metal piping parts for use with sea water.

50 LITRE FOAM CABINET

Our NOHA special fire hose reel and cabinet with 50 litre foam tank is ideal for mounting outdoors or in a corrosive environment. The swinging hose reel combined with 3% foam inductor which is fed from a 50-litre stainless steel tank with an action time approx 20 minutes. The stainless steel cabinet is splash-proof, insulated and equipped with a thermostatically controlled heating element and can withstand temperatures down to -35°C (measured in zero wind) without the water freezing.

25 LITRE FOAM TANK

Our NOHA special fire hose reel with 25 litre foam tank provides 80 litres of water per minute mixed with 3% foam concentrate at 6 bar water pressure. Suitable for fighting fires involving carboniferous materials and flammable liquids; the foam works as a wetting agent effective against deep-seated fires. Is also recommended for sealing spills of flammable liquids.
