

Green PVC Suction Hose

Our Green Medium Duty PVC hose is a general purpose suction and delivery hose. The hose is reinforced with a shock resistant PVC Spiral giving structure and allowing greater flexibility. Suitable for medium duty suction and delivery of water, salt water, light chemicals and liquids in Agricultural, Industrial and construction applications.

HOSE DETAILS

Our Green Medium Duty PVC hose is a general purpose suction and delivery hose. The hose is reinforced with a shock resistant PVC Spiral giving structure and allowing greater flexibility.

The Green Medium Duty PVC hose is characterised by hard wearing, lightweight, flexible and kink resistant structure produced and small coil diameter. It is a multi-purpose hose suitable for a wide range of applications.

Its abrasion resistance properties provide contact resistance to oil, fuel and chemical products along with ozone weather resistance.

Cold resistant to - 5 °C.

Heat resistant up to + 60 °C.

COUPLING

Can be coupled with BS 336 Instantaneous, BSP, Camlock or all international coupling types clamped or swaged for security. The correct coupling method would depend on the application and coupling type.

BSP Coupling

Internal Diameter		BAR	M.H ² O	Bend Radius	Lengths
mm	inch				
25	1	22	8	140	10 / 20 / 30 / 50
32	1 ¼	20	8	150	10 / 20 / 30 / 50
38	1 ½	18	8	180	10 / 30 / 50
51	2	13	8	220	6 / 10 / 20 / 30 / 50
