

Branchpipe Holder

A lightweight unit designed to provide the user with a more comfortable handling position by diverting the reaction forces of the water jet.

It can be coupled between hose and branchpipe when the hose is extended over a wall edge or window sill to prevent kinking.

MATERIALS:	Aluminium
CONNECTION OPTIONS:	2 ½" Male BSP
	2 ½" Instantaneous

Can be connected to all other international connection types using threaded adaptors.

SAMPLE CONNECTION OPTIONS

with Plain Jet Nozzle

with Diffuser Nozzle
