

## Globe Pattern Valve

A range of 65mm nominal diameter 'low pressure' fire hydrant landing valves suitable for both onshore and offshore/marine applications, predominantly used on wet riser systems. Our Globe Pattern Valves are manufactured in accordance with BS 5041 Part 1.

### INLET OPTIONS:

PN16  
BS10 Table D  
ASA/150  
BSP thread

### OUTLET OPTIONS:

64mm Female Instantaneous to BS336  
Blanking plug & chain available in gun metal, rubber or plastic

*Other inlet and outlet options available on request.*

### FEATURES:

Primary shut-off by rubber to metal seating with secondary metal to metal sealing.  
Department of Transport approved for compliance with Merchant Shipping Regulations.  
Valve bodies and internals designed for 20. Bar working pressure, seating at shut off tested to 16 Bar.  
Pressure rating of individual valves is dependant on inlet and outlet connections.

### MATERIALS:

Gun Metal to BS1400 Grade LG3  
5" Handwheel in cast iron  
Red paint finish available as an option

*Bib Nose*

*Right Angle*

*Oblique Pattern*

*Horizontal*
